Women, Wealth and Wisdom

Women, Wealth and Wisdom helps high net worth women position themselves wisely in light of their wealth, whether following marriage, divorce, inheritance, or death of a spouse, or resulting from a successful business venture. Our program allows each woman to explore the nature and meaning of money in light of her own life experience, working individually and in a group context, as she develops financial understanding to sustain and enhance her personal relationships.

Common themes include:

- Knowing whom to trust
- Talking about money in my intimate relationships
- How to relate if I have more/less money than my friends/family
- Making strategic financial choices

We also [work with women](#) to help strengthen their financial literacy to prepare them to address and take responsibility for the tangible dimensions of their wealth.

Our goal is for each woman to attain a level of competence and confidence with her money, to align the ways in which she handles her wealth with her core values, and to enjoy her wealth as she makes clear, conscious choices.
